PROFILE

First-year Computer Science Engineering student (SGPA 9.53) with hands-on experience shipping small full-stack projects — including a deployed portfolio site and a study-material web app with a live database backend. Comfortable across C, C++, Python, Java, and the HTML/CSS/JavaScript stack, and currently deepening skills in Data Structures & Algorithms. Looking for a Summer/Winter internship or open-source contribution opportunity to apply and grow these skills on real engineering problems.

PROJECTS

Heritage Study Material — *In Progress*

[GitHub](#) · [Live Demo](#)

- Building a study-material web app in TypeScript for HITK course topics, with a Supabase-powered backend for storing and serving content to classmates.
- Focused on clean UI/UX and structuring a real (non-mock) relational database instead of static content.

Personal Portfolio Website

arghyaportfolio.vercel.app

- Designed and shipped a responsive single-page portfolio using React.js, deployed on Vercel, to showcase academic progress, skills, and projects.
- Integrated Email.js to handle a working contact form without a dedicated backend server.

Student Database Mini-Project

- Developed a CRUD-style Java application for managing student records, implementing file I/O and basic data modeling.

ACTIVITIES & INVOLVEMENT

- ACM HITK Student Chapter — participated in WELCOME.YML (2025), an induction/tech-community event for CS students.
- E-SUMMIT 2025 — attended, organized by the Entrepreneurship Development and Innovation Cell.
- DAKSH HITK 2026 — competed in a Quiz Competition and a Valorant esports event.
